Contemporary design in a reliable, flexible and quiet mobile workstation.

The [HCI Mobile Cart](#) offers utility with quality components for ease of use, ideal for the hospital, healthcare or residential/rehab setting.

With a contemporary, extruded brushed aluminum surface and laminated shelf, your Mobile Cart includes a 32" touchscreen display monitor, powerful backup battery and [HCI HealthKey Infection Control Keyboard](#). Software for initiating videoconference calls comes already installed on the display and utilizes the built-in camera and speakers in the touchscreen. Comes with feature-rich UPS back-up battery.

CART FEATURES

- Sturdy base and casters for smooth mobility; heavy duty with quality parts; simple assembly.
- Mounting post features a wire guide to reduce trip hazards.
- Laminated work surface is resistant to spills and marks.
- Side-mounted CPU back-up battery.
- Withstands frequent cleaning and disinfection.
- Adjustable post accommodates any display screen up to 32".
- Integrated power strip with nine transformer block outlets.
- Covered power switch to prevent accidental shut-off.

BATTERY FEATURES

- Three surge protector-only outlets, two USB charger ports.
- Right-angle, three-prong power plug with 5' cord.
- Wall-mountable if needed; standby topology.
- "Faulty Wiring" alarm to warn for bad building or wall wiring.
- Continuous Overload and Low Battery Alarms.

CONNECTION

The Mobile Cart brings clinicians and patients together for video questions and health check-ins with [HCI Telemedicine](#) options. Used with [Family & Friends Connect](#), video visits held at the in the room or at bedside offer encouragement, reassurance and an opportunity for connection to social, spiritual and entertainment options outside the facility.

SCHEDULING

RFID tagging on the Mobile Cart means you know where it is, when you need it. Tag the cart for an integrated inventory system for stand-alone tracking by floor, wing, department or building.

INFECTION CONTROL

The mobile cart can withstand frequent hospital cleaning and disinfecting. The [HCI HealthKey Infection Control keyboard](#), designed specifically for healthcare use, has "Number of Touches" setting with "Time to Clean" alerts. Sealed to IP67 standards. Wired, wireless or Bluetooth connection options.
