

HCI HUB Set Top Box

- ✓ Enterprise Scalability and Management
- ✓ Android™ Operating System
- ✓ Up to 4K Video Output
- ✓ Quad Core 64-Bit Processor
- ✓ Expandable Memory
- ✓ Customizable Branding

HUB turns any TV with an HDMI port into a smart TV. Upgrade existing TVs into powerful patient engagement tools, at scale.

The [HCI HUB Set Top Box](#) is a scalable, flexible platform to provide patients a wide range of service and entertainment options. Powered by [MediaCare](#), the HUB offers healthcare providers robust data reporting to assist with scheduling, purchase and resource decisions.

For Patients and Residents

- Take advantage of quality [surveys](#) and tailored self-service options.
- Instant access to [educational](#) content, movies, Internet, email, social media and streaming apps and games.
- Utilizing the existing [Pillow Speaker](#) or remote, patients navigate to Apps using arrow selection via the menu with a simple click, just like they would at home.
- [Medication](#) Search, Pharmacy Fulfillment, [relaxation](#) content and bedside [meal](#) or retail ordering.
- View Care Team and access health information.

For Health and Residential Care Providers

- Maximize reimbursements by ensuring patient satisfaction to exceed CMS regulations.
- Equip patients with useful educational content and measure comprehension to ensure understanding.
- Connect and communicate with more providers to deliver automated and customized care plans.
- Craft a robust solution administered across the network from a single location or data center.
- Remote configuration and updates with push notifications to in-room TVs even if the TV is off, minimizing patient inconvenience.

ENTERTAIN

Residents can choose the [multimedia content](#) that works best for them: watch on-demand movies, stream and binge shows, listen to podcasts and choose relaxation content.

EDUCATE

Android apps engage and teach clients and their families information they need to maintain their optimum cognitive and physical wellbeing, with thousands of [digital health videos](#) available.

MANAGE

[Administer](#) workflows, automatically update EHR information for better collaboration, and push reminders for appointments, ADT planning activities and therapies direct to patients.

ENGAGE

Clients can [order food](#) from their rooms direct from the facility, tailored to their treatment guidelines. Offer Gift Shop ordering, direct Pharmacy fulfillment and self-service options to reduce non-clinical tasks.

MEASURE

Schedule [data reporting](#) based on specific or aggregated data. Tailor reports to your needs to monitor efficiencies, quality directives and service recovery initiatives.

Transform the way you deliver care.
