

HCI INTERACTIVE HYBRID WHITEBOARD

- ✓ Infection Control Design
- ✓ Android™ Operating System
- ✓ Dry Erase Section for Notes and Cards
- ✓ High Impact Tempered Glass Surface
- ✓ High Resolution LCD Screen with LED Backlight
- ✓ USB, HDMI, Bluetooth and Ethernet Inputs
- ✓ Video and Audio Built In
- ✓ Magnetized with Magnets Included

The HCI Interactive Hybrid Whiteboard is a complete solution for patient engagement, education and entertainment. The Hybrid Whiteboard supports a better patient experience by providing educational content and choices for entertainment through digital touchscreen integration. Through [MediaCare](#) over the enterprise, push educational content and messaging. Provide CareApps for patient self-service of nonclinical requests.

HYBRID FEATURES FOR ENGAGEMENT

The Interactive Hybrid Whiteboard acts as a visual communication conduit to align care delivery across teams. The magnetized dry erase section allows caregivers and clinical staff to write specific notes and attach papers or orders. On the upper touch surface, patient protocols are fully touch-customizable based on diagnosis or clinical order, without the use of sliders, flags or stickers. Rounding notes and Next and Last Rounding information are clearly displayed and automatically updated. Care Team identification is displayed and Care Team ID updates at shift change.

- Pre-load educational content, or use MediaCare to push [new content](#) based on diagnosis code or clinician order from the EHR.
- Record pain levels and other rounding data direct to the EHR.
- Provide streaming games, music, social networks, [relaxation content](#), or on-demand entertainment.
- Displays current medications and offers Medication Search with photo identification and side effects.
- Offer Bedside Meal Ordering and ordering of rental equipment or retail items from retail spaces and on-site Pharmacy Fulfillment.

PREVENT INFECTION

A full tempered glass surface makes written notes easy to clean and easy to disinfect with approved hospital disinfectants with no loss of patient data.

INTEGRATE

With MediaCare integration, set restrictions and protocols using InfoTiles, without flags or sliders. Automatically update integrated systems including EHR, RTLS, LDAP, ADT, Rounding, EVS and more at the touch of a button.

INFORM

Through MediaCare, [Send essential messages](#) to provide reminders and notifications such as facility maintenance, housekeeping, status of requests and food menus. Push reminders for appointments and display discharge plans as they are updated in the EHR.

RESPOND

The Visitor Log creates a record of all staff entering and leaving the patient room. Triggered Alerts are color-coded and stack on the display according to priority with elapsed time.
