HCI INTERACTIVE UNIT WHITEBOARD

- ✓ HIPAA-Compliant
- ✓ Digital Screen Replaces Inefficient Dry Erase Patient Monitoring Boards
- ✓ Touch-Enabled, High Contrast Display
- ✓ Built-In Camera and Microphone to Support Video Capabilities
- ✓ Stands Up to Frequent Cleaning and Disinfecting
- ✓ Low, Adjustable Wall Profile Fits Any Interior

The HCI Interactive Unit Whiteboard is a HIPPA-compliant, touch-enabled digital patient monitoring whiteboard that supports operational, workflow and staffing efficiencies by providing patient data visibility at-a-glance in the Nurses' Station.

Operating on the HCI MediaCare platform, the Interactive Unit Whiteboard integrates with the EHR and other interactive devices for accurate, consistent patient identification and rounding.

CRITICAL INFORMATION MADE ACCESSIBLE

- o The Unit Whiteboard aggregates from the facility's EHR, RTLS, Nurse Call, PAC, EVS, BMS, LDAP and other systems, automatically updating when a change is made to either the patient's in-room interactive device or the EHR.
- o Allows one-touch video calling direct to patient rooms for virtual rounding and patient care.
- o Alerts staff when an alert is triggered and displays the elapsed wait time since the patient has requested help.
- o Digitally enter and update restrictions and protocols with InfoTiles©.
- o Push surveys, notifications, reminders and announcements direct to Residents and Patients.
- o Robust reporting and data analysis for scheduling and fiscal management.

Support team collaboration for care delivery from a central location. Streamline and optimize workflows so teams can focus on quality care and building patient relationships.

⚠ INFORM

The Unit Whiteboard covers a hall, wing, or unit of patient rooms or beds. Alerts, Visitor Status, Restrictions and Protocols, Care Team and Education Compliance are instantly visible. View color-coded alerts at a glance for faster response.

COLLABORATE

Clinicians can immediately see Next and Last Rounding staff, times and notes entered to align care plans.

COMMUNICATE

From the Nurses' Station, video chat directly with patients in response to Nurse Calls from the Pillow Speaker or Interactive Tablet. Call direct to Interactive Bedside Tablets or Interactive Patient Whiteboards. Conserve limited PPE supplies and video chat with other staff members in patient rooms where isolation protocols may be in place.

MONITOR

Assign and monitor education compliance based on diagnosis code and as patient situations change. View percentage of education completed, and assign additional content with reminders to view content for better discharge results.

ADVISE

Send essential messages to provide reminders and notifications such as facility maintenance, housekeeping, status of requests and food menus. Push reminders for appointments, daily schedules and discharge plans direct to TV and interactive devices.
