- ✓ Ideal for all Healthcare and Infusion Settings

The HCI Interactive Bedside Tablet is more than a standard touchscreen tablet. Operating through the HCI [MediaCare](#) platform, it's part of a complete solution for a better patient experience. This tablet offers patients [education](#), [entertainment](#) and [social connection](#).

Help patients cope with challenging situations using education and entertainment apps, alleviating anxiety and boredom for better outcomes.

FOR PATIENTS

- Displays current medications and offers a [Medication Search](#) app.
- Video chat with Nursing and Care Teams from the bedside.
- Visitor Log displays all staff entering and leaving patient room pairing with RTLS system.
- Patient access to treatments, care plans and rounding notes.
- Displays Care Team names and photos; auto-updates at shift change.

UNIQUE FACILITY BENEFITS

- [Push surveys](#), notifications, reminders and announcements direct to the patient.
- Customizable banners, branding, colors and layouts by facility, unit, department or specialty.
- Access to [reporting and data analysis](#) to monitor viewing, education compliance and patient status, all in real time.

Patients can access a range of entertainment, relaxation and gaming apps, with personal device ports for using their own devices and apps.

EDUCATE

Includes Android apps that teach clients and their families the supplemental information they need for discharge, with thousands of [digital health videos](#) available. Send reminders for education compliance to [reduce readmission risks](#).

ENTERTAIN

Residents can choose the [multimedia content](#) that works best for them: on-demand movies, streaming music, podcasts and games. Relaxation content provides a respite from stress for patients and [visitors](#).

INFORM

[Send essential messages](#) to provide notifications on facility maintenance, housekeeping, status of requests and menus. Push reminders for appointments direct to TV, Tablet and Whiteboard.

CONNECT

Offer safe internal & external videoconferencing for [Telemedicine](#) and virtual family visits with [Family & Friends Connect](#). Staff can video direct to rooms to answer questions and determine [fulfillment](#) of service requests.

INTERACT

[Meal Ordering](#); easy ordering of rental equipment or retail items from facility spaces and on-site [Pharmacy Fulfillment](#). Patients can [request services](#), direct to specific departments for fulfillment.
